## FERABOLI ROUND BALERS

Feraboli round balers are designed for the maximum flexibility and reliability in any condition. The baling chamber is equipped with a series of sturdy and reliable rollers. Delicate with premium hay and perfect with moist fodder, also ideal with difficult products such as cornstalks and straw. Long life, high work capacity, perfectly shaped bales, compact and heavyweight: all these features make Feraboli round balers a profitable investment.

# TROTTER 125 - 125 CUT - 125 ULTRACUT

The high level technology applied guarantees the maximum productive capacity. Heavy duty, with the rollers' gears and pins tempered. Easy to use and suitable to work on any type of land. High level performance up to 50 bales/hour.

## HANDY AND PRACTICAL

**TROTTER** is a highly professional machine with an 18-roller fixed chamber. It is especially suited to work in mountain regions or where a small but heavy bale is required. All machine functions can be executed comfortably from inside the cab of the tractor using the electric pushbutton control panel.

# TROTTER 125 - 125 CUT - 125 ULTRACUT

## TECHNICAL DETAILS

Each of the 18 rollers counts on heavy-duty bearings, mounted in cast iron housings and firmly bolted to the outside of the compression chamber. Each roller can be removed for maintenance, without needing to dismantle any other important component.

Power is transmitted by chains with a 1" pitch combined with large diameter driving sprockets to minimise wear. The chains can be equipped with continuous oil lubrication.

## READY TO USE

Feraboli balers are used worldwide in any type of condition, and therefore they are perfectly functional with straw, hay and wilted silage. Our machines do not fear fragile straw and hay during droughts and heavy moist silage.

CHAMBER	TROTTER 125	TROTTER 125 TOPCUT	TROTTER 125 ULTRACUT
